

## START OF PRINT ADJUSTMENT PROCEDURE

1. Install stock into the unit. Select the appropriate stock (bagtag, cargo, boarding pass, etc.)
2. Print two consecutive tags or coupons. Verify that the start of print of each is within 1/32 inch of each other. If not, perform the following:
3. Using the diagram below as a guide, adjust the TOF forward and backward step settings in the menu SERVICE/"Customer Specific Stock Type Name"/TOF SETUP/BACKWARD or FORWARDS STEPS

### + TOF Forward Steps

Moves second tags start of print position away from the edge

### – TOF Forward Steps

Moves second tags start of print position toward the edge

### + TOF Backward Steps

Moves first tags start of print position away from the edge

### – TOF Backward Steps

Moves firsts tags start of print position toward the edge
